PRODUCTION HISTORY

Freelance Full-Stack Developer

2025 – Present

- Designed and built full-stack POS, ERP, and mobile applications end-to-end for multiple business and personal clients, covering backend APIs, databases, and deployment.
- Delivered production systems using **FastAPI**, **PostgreSQL**, **React**, and **Flutter**, integrating subscription logic, offline support, and multi-platform clients (web, desktop, mobile).
- Managed deployment infrastructure including **Docker**, **Nginx**, and **Cloudflare Tunnels** across multiple VPS environments.

Backend Developer Intern · Infinity Digital LLC ([iwm.cx](#))

Jan 2026 – Jun 2026

- Implemented FastAPI backend routes and business logic for an airline ticket booking platform, integrating PostgreSQL and Redis.
- Built JWT-based authentication flows and core booking logic within an existing production codebase.
